EXPERIENCE

GRO Marketing, Detroit, MI

Full Stack Developer February 2023 - PRESENT

- **Sole developer and architect** of a large-scale real-time CRM and workflow platform, leading end-to-end development across system architecture, backend services, frontend engineering, UI/UX design, and third-party integrations.
- Architected backend infrastructure on AWS using RESTful APIs, integrating both MySQL and DynamoDB to support diverse data needs and high availability.
- Designed and implemented a **shared caching layer** for the organization's largest dataset, enabling real-time freshness and consistency across sessions while significantly reducing backend load.
- Engineered WebSocket systems and dynamic data synchronization for live contract and campaign tracking across the platform.
- **Refactored the entire frontend codebase** to TypeScript, improving type safety, maintainability, and scalability across a rapidly expanding application.
- Enhanced React Query-based data flows with optimized cache invalidation strategies, resulting in more reliable and responsive user experiences.
- Streamlined business operations by automating processes for onboarding, deal management, contract merging, and client communications.
- Implemented structured Git workflows and versioning (standard-version), ensuring clear release management and traceability.
- Coordinated phased testing and successfully deployed the application to production within 8 months of inception.
- Prioritized scalability, performance, and long-term maintainability in all systems, laying the foundation for future team expansion.

Lightspeed Delivery, LLC Hamburg, MI

Owner

January 2010 - March 2023

- Founded and operated a successful freight expediting company for over a decade, overseeing operations, client relationships, and financial strategy.
 - Built custom pricing and quoting systems using Python, JavaScript, and Excel integrations to improve operational clarity and profitability.
 - Leveraged data automation tools to maintain accurate financial and business records, supporting consistent year-over-year growth and high client satisfaction.
 - Cultivated long-term partnerships through clear communication, reliability, and rapid response times.
-

EDUCATION

Washtenaw Community College, Ann Arbor, MI

Computer Engineering

January 2006 - December 2008

TECHNICAL SKILLS

- **Languages & Frameworks:** TypeScript, JavaScript (ES6+), React, Node.js, Python
 - **Cloud & Infrastructure:** AWS (EC2, S3, DynamoDB), WebSocket, Apache2, PM2, Caching Layers, RESTful APIs
 - **Architecture & Tools:** System Design, Real-Time Applications, TypeScript Refactoring, React Query, Git, Standard-Version, ESLint
 - **Integrations & APIs:** PandaDoc, Slack, Google APIs, AWS SDK, Zoho CRM
-
